

# Take The Fight

## Wage War

Is anybody out there? Let me know  
Feel like you're over it, had enough?  
Are you afraid to wake up, 'cause it shows  
Tell me what it takes to break and let go

Is anybody out there? Let me know  
Feel like you're over it, had enough?  
Are you afraid to wake up, 'cause it shows  
I'm not gonna break and bow to no throne  
(Break and bow to no throne)

I know, I know that I am not alone  
When I'm standing on my own  
They can say what they say, say what they say  
But it doesn't change

I know, I know that I am not alone  
When there's nowhere else to go  
They can say what they say, blame who they blame  
But they can't take the fight from me

Take the fight  
Can't take the fight from me  
Take the fight

I'm not gonna stand down, be afraid  
Living like I'm one foot in the grave  
I refuse to let you do the same  
Tell me what it takes to break your own chains

I see PAIN I see RAGE  
See the change that you want written on your face  
I see PAIN I see RAGE  
See the world as a place where we're all the same

I know, I know that I am not alone  
When I'm standing on my own  
They can say what they say, say what they say  
But it doesn't change

'Cause I know, I know that I am not alone  
When there's nowhere else to go  
They can say what they say, blame who they blame  
But they can't take the fight from me

(Can't take the fight from me)  
(Can't take the fight from me)

I see PAIN I see RAGE  
See the change that you want written on your face  
I see PAIN I see RAGE  
See the world as a place where we're all the same

I know, I know that I am not alone  
When I'm standing on my own  
They can say what they say, say what they say  
But it doesn't change

I know, I know that I am not alone  
When there's nowhere else to go  
They can say what they say, blame who they blame  
But they can't take the fight from me

Take the fight  
Can't take the fight from me
