

## Far And Away

Walter Egan

By Walter Egan and Chris James  
How come everyone says we're fine  
It looks so different here inside  
Too many nights we fuss and fight  
A whole lotta love gets pushed aside  
Far and away, far and away you're the best I ever had  
But far and away is where I want to be  
When close to you just feels so bad, feels so sad.  
You and I we've come so far  
We still don't know just who we are  
Sometimes I feel like running away  
Rather than face what I should say  
Chorus  
Standing at the crossroads, which way should I turn  
Should I try to make amends  
Or let my bridges burn, bridges burn  
Based on everything we've been through  
I wish I could end up with you  
But I can't help the way I feel  
And other roads hold their appeal  
Chorus
