

# Travel Far Away

Wardrum

You know, it's easy to live in agony and pain  
Under the weight of your fears; burn the years in vain  
Just keep your head down and do all that you despise  
Or stick to your warm nest and never fly

The hard part is making the dream come alive  
To stay right on track every day  
Reach for the top and marvel at the beauty  
Of your self-made reality

Time falls behind you as your weak part leads on  
Step on a wish and travel far away  
Turn all your wounds and pain into wisdom  
Follow your heart and you will find your way  
Far away

If you cannot dare to fall you cannot achieve  
You only choose to exist and to never live  
Bury each battle you lost into yesterday  
Spread your wings now and fly away

The hard part is making the dream come alive  
To stay right on track every day  
Reach for the top and marvel at the beauty  
Of your self-made reality

Time falls behind you as your weak part leads on  
Step on a wish and travel far away  
Turn all your wounds and pain into wisdom  
Follow your heart and you will find your way  
Far away

The shining stars you wish upon  
Can help in no way when faith is missing

The hard part is making the dream come alive  
To stay right on track every day  
Reach for the top and marvel at the beauty  
Of your self-made reality

Time falls behind you as your weak part leads on  
Step on a wish and travel far away  
Turn all your wounds and pain into wisdom  
Follow your heart and you will find your way  
Far away, far away
