

# My Fallen Angel

Warmen

Look into my eyes, tell me what you see  
I'm reaching out my hand, to set you free  
Take a walk with me, through the endless night  
Together we can take, whatever is in our sight

Here we stand on the edge of the world  
A new day has begun

I'm calling out your name, I'll take away the pain  
I will guide you, fallen angel  
Can you see the sign it hides inside your mind?  
It will guide you, fallen angel

Another night has come, shadows fade away  
You have to count on me, I'll take all the pain away  
Take a walk with me, through the halls of time  
Together we can fight, whatever is in our sight

Here we stand on the edge of the world  
A new day has begun

I'm calling out your name, I'll take away the pain  
I will guide you, fallen angel  
Can you see the sign it hides inside your mind  
It will guide you, fallen angel

Here we stand on the edge of the world  
A new day has begun

I'm calling out your name, I'll take away the pain  
I will guide you, fallen angel  
Can you see the sign it hides inside your mind  
It will guide you, fallen angel
