I knew there's something about you  
From the moment I saw you  
Like a perfect shinning star  
I needed to walk right to you  
And tell you I want to  
Be with you wherever you are

You're the only one  
Moon and the sun to me  
So babe c'mon  
C'mon let's get this started

We should be together  
'Cause it's now or never  
We might never be here again

Now that we found each other  
You know we discover  
What our new world has in store  
This life has no limit  
As long as I've got you in it  
I never felt like this before

You're the only one  
Moon and the sun to me  
So babe c'mon  
C'mon let's get this started

We should be together  
'Cause it's now or never  
We might never be here again  
I couldn't want another  
Like a perfect lover  
C'mon baby let me in

We should be together  
'Cause it's now or never  
We might never be here again  
I couldn't want another  
Like a perfect lover  
C'mon baby let me in

We should be together  
'Cause it's now or never  
We might never be here again  
I couldn't want another  
Like a perfect lover  
C'mon baby let me in...
