

They Moved the Moon

Warren Zevon

I was counting on you
To stand by me
To see me through
I was counting on you

They moved the moon
While I looked down
When I looked away
They changed the stars around

I'm so confused
Don't know what to do
Don't know which way to turn
I was counting on you

They moved the moon
While I looked down
When I looked away
They changed the stars around

Can't you see me?
Can't you hear me now?
Don't you want a love that's true?
Don't you know my heart belongs to you?

I was counting on you
To stand by me
To see me through
I was counting on you

They moved the moon
While I looked down
When I looked away
They changed the stars around

They moved the moon
I feel so strange
While I looked down
Everything I depended on
When I looked away
Has been rearranged
They changed the stars around
