Twenty Twenty

Wavorly

Time flies when you have fun
But when the world falls down you turn and run
Like it's over now, over now
But there's more to Who you say you know
And it's your own fault your faith won't show
Like it's over now, over now
And it's your time

Your time though no signs seem congruent You'll find the design plays into it Time to let this go, you never had control We can look back to when He was there for us

Take all that you have learned when you were on your face Now it's your turn to give it out, give it out Looking back to when the lights went out There never was a reason for you to doubt And it's over now, over now And it's your time

You'll find the design plays into it
Time to let this go you never had control
Look back home weary soul
Recall the times of old to face the new
Your faith will overcome
We can look back to when He was there for us
