

## It's a Hit

## We Are Scientists

I should've known that this would happen from the start  
This kind of function's gonna have to fall apart  
I guess before I would've sworn that we were friends  
Maybe this problem points towards some larger trend

But I still don't understand  
What this whole thing's about  
And all the words that you said  
Are somehow stuck in my mouth  
And this was going so well  
But I don't know what I did  
All I really can tell, is  
I've been hit  
I've been hit  
I've been hit

Well there's only so much drama I can stand  
And this is just about as far as I will bend  
So get your hands of my lepel  
Because I think it's time to go  
You oughta know better.  
You know,  
You oughta know

But I still don't understand  
What this whole thing's about  
And all the words that you said  
Are somehow stuck in my mouth  
And this was going so well  
But I don't know what I did  
All I really can tell, is  
I've been hit  
I've been hit  
I've been hit

As I was falling down the stairs  
And out the door  
I guess I heard you yell my name  
But I'm not sure  
You know before I could've sworn that we were friends  
But that's how these problems always seem to end

But I still don't understand  
What this whole thing's about  
When all the words that you said  
Are somehow stuck in my mouth  
And this was going so well  
But I don't know what I did  
All I really can tell  
Is that I always get hit

And I still don't understand  
What this whole thing's about  
And all the words that you said  
Are somehow stuck in my mouth  
I guess I might take it back  
But I'm not sure what I did

All I know about that, is  
I've been hit  
I've been hit  
I've been hit
