

# Heaven So Close

We the Kings

Stay, stay

Feel the world slip through your hands  
Where you fall is where I land  
If I break will you take me as I am?  
To the moon light the sky and dance

With heaven so close  
I can feel her in my veins  
With heaven so close  
I can hear her say my name

We belong to the stars  
Two eternal hearts  
We belong to each other's arms

With heaven so close  
Every light illuminates  
But I will stay, I will stay

Falling closer to the sky  
Write your name right next to mine  
And we'll sleep with the satellites

Take you high  
Take you high above the lights

With heaven so close  
I can feel her in my veins  
With heaven so close  
I can hear her say my name

We belong to the stars  
Two eternal hearts  
We belong to each other's arms  
With heaven so close  
every light illuminates  
But I will stay a world away  
Oh, I will stay a world away

With heaven so close  
I can feel her in my veins  
With heaven so close  
I can hear her say my name

We belong to the stars  
two eternal hearts  
We belong to each other's arms  
With heaven so close  
Every light illuminates  
But I will stay, I will stay  
Oh I will stay, I will stay  
I will stay, I will stay with you
