

Howl at the Moon

We the Kings

I don't know who you are tonight.
A million miles in between your kiss and mine,
Alien all you in my life at all.
What's a story without a name?
A thousand memories we made just to forget.
Will I ever see you again, my alien?

Without you I howl at the moon.

Cause you were always the one with the fire,
You were always the one who got higher,
You were always the one,
You were always the one.
You were always the one with the fire,
You were always the one who got higher,
You were always the one,
You were always the one.

Fell so hard when you hit the ground,
When the weight of the world just pull you down.
I wanna see you, remember how to live again.

Without you I howl at the moon.

Cause you were always the one with the fire,
You were always the one who got higher,
You were always the one,
You were always the one.
You were always the one with the fire,
You were always the one who got higher,
You were always the one,
You were always the one.

So show me that fire, fire, fire, fire, fire, fire
Show me that fire, fire, fire, fire
Show me that fire, fire, fire, fire, fire, fire
Show me that fire, fire, fire, fire

So let it burn,
Light it up for you and I.
Let it burn,
Light it up and watch it die.
Let it burn,
Light it up one more time.

Cause you were always the one with the fire,
You were always the one who got higher,
You were always the one,
You were always the one.
You were always the one with the fire,
You were always the one who got higher,
You were always the one,
You were always the one.

So show me that fire, fire, fire, fire, fire, fire
Show me that fire, fire, fire, fire
Show me that fire, fire, fire, fire, fire, fire

Show me that fire, fire, fire, fire
