

## I Keep It Composed

### We Were Promised Jetpacks

I'm forever leaving the party  
Making excuses and waking up early  
At times I just catch myself in the mirror  
Repeating the phrase "Just keep it together"  
You break through and appear out of nowhere  
We go back, we go forth but we'll all pass forever  
Now I have no more fear of darkness  
Until someone's finger is over the light switch  
I pretend I am slowly easing the pressure  
But I'm always acutely aware of the danger  
Right on the cusp and the next step is crucial  
The night gone to hear the sound of you breathing  
Now I have no more fear of the darkness  
Until someone's finger is over the light switch

I keep it composed  
I keep it so poised  
I keep it together  
Keeping the ship  
From sinking the treasure  
Pull us apart  
Tear us apart  
Then bring us together  
Put up with pain, to stick with the pleasure

I keep it composed  
I keep it so poised  
I keep it together by  
Keeping the ship  
From sinking the treasure  
You drew us apart  
You tear us apart  
Then bring us together  
I'm filled up with pain, I'm filled up with pain, I'm filled up  
with

And I have no more fear of the darkness  
And I have no more fear of the darkness  
And I have no more fear of the darkness  
Until someones finger is over the light switch
