

Magic

Westlife

Maybe your little spark
Just a flicker in a street light
As you walking pass
Maybe somebody beside you
That you don't even know yet
Was going to rescue your heart

Maybe it's the little things you lose on the way
You forget who you are
So maybe take your chance tonight
Cause I can see that color blue
All the shade of you
But you got nothing to lose

Cause you're magic oh magic
Burning like a shooting star
Yeah you're magic oh magic
Let your fire lighting the dark

No matter who you are
You can make it come true
You got magic in you

Making you waking up
With no one beside you
No one to get you through
Maybe you're all dressed up
When no one to hold you
And the night's a lonely too

Maybe you got to believe in all of your dreams
Cause you know who you are
So baby take your chance tonight
Cause I can see your colors true in you
That was blue
Yeah you got nothing to lose

Cause you're magic oh magic
Burning like a shooting star
Yeah you're magic oh magic
Let your fire lighting the dark

No matter who you are
You can make it come true
You got magic in you

Maybe it's the little things you lose
On the way you forget who you are
So maybe take your chance tonight
Cause I can see your colors true in you
That was blue
Yeah you got nothing to lose

Cause you're magic oh magic
Burning like a shooting star
Yeah you're magic oh magic
Let your fire lighting the dark

No matter who you are
You can make it come true
You got magic in you

You got magic in you
