

## Canyon on Fire

Wild Nothing

Bars are all closed  
But I can't stand the thought of going home  
Cheap red wine, fireworks over the freeway  
Stretching the sky  
When it rains in L.A. you all most forget  
How it smells when the whole city is burning

Let's drive around  
I want to see how other people live  
Needless palaces kissing the hillside  
Take your pick  
Every dream exactly like the last  
You and I in a canyon on fire

Who would I be without you?  
Who would I be without you?  
Who would I be without you?  
(Someone I don't know)  
Who would I be without you?  
See right through me  
See right through me

See right through me  
Who would I be without you?  
Who would I be without you?  
See right through me
