

My Angel Lonely

Wild Nothing

Calming down with my hand in the sand
Come away, come away
To begin, let's get closer
Doesn't he love me?

Just you wait by the withered trees
Glass in my knees
Because I'm losing comfort
Doesn't it feel right?

Just to be close
When you're blowing your hair in the perfect waves
You're trying your best just to push me away
I can't ever tell since you were never there to begin

My angel in loneliness
My angel lonely
My angel in loneliness
My angel lonely

Passing by, I should have known
(?)
White glow
Step in the white glow

Make me, make me
(?)
(?)
(?)

Just to be close
When you're blowing your hair in the perfect waves
You're trying your best just to push me away
I can't ever tell since you were never there to begin

My angel in loneliness
My angel lonely
My angel in loneliness
My angel lonely
