

A Promise

Will Downing

I know that lately we've been disagreeing
Much more than we get along
And every time I try to see what your seeing
I only see it wrong
When does the trying become waiting to give up
And it doesn't matter anymore
That a promise is a promise
Did you mean it when you said
That forever was forever
Can you take back the love you already gave away
It's been a while since the last time you kissed me
For more than to say goodbye
And I admit I haven't told you lately
That your the girl I still desire
This life is moving so much faster than we planned
We can still go back to where we began
A promise is a promise
Did you mean it when you said
That forever was forever
Can you take back the love you already gave away
A promise is a promise
Did you mean it when you said
That forever was forever
Can you take back the love you already gave away
The best time of my life is when I see you smile at night
You know whats on my mind before I say word to explain what I'm
feeling
But This life is moving so much faster than we planned
We can still go back to where we began
Cause a promise is a promise
Did you mean it when you said
That forever was forever
Can you take back the love you already gave
A promise is a promise
Did you mean it when you said
That forever was forever
Can you take back the love that you already gave away
A promise
