

Something's Going On

Will Downing

Making small talk 'til there's nothing left to say
Make believing it's just another day
My heart keeps telling me that come what may
There's something going on

Look and smile in the usual way
As implying that everything's okay
I'll be a fool, let my heart be lead astray
There's something going on

Keeping our cool, treading light
Soft and light but something just ain't right

Go up early take some time to unwind
Just for a little while we'll pay the world no mind
It will deceive you to let folk lead your blind
There's something going on

Still pretending we'll have ourselves a ball
Ignore the writing that is on the wall
Cods on the table I wish I knew it all
There's something going on

Keeping our cool, treading light
Soft and light but something just ain't right

Look and smile in the usual way
As implying that everything's okay
I'll be a fool, let my heart be lead astray
There's something going on

Keeping our cool, treading light
Soft and light but something just ain't right
