

Just Up The Road

Will Hoge

Just up the road there's a road
That leads to another road
Take us anywhere tonight
Put the pedal down right now
And we can head straight outta town
Start a whole new life

And there's a place called forever
And we can go there together
We both want something better, baby
And I know it's waiting

Just up the road there's a chance
Ain't that all we ever wanted, darling?
What have we got to lose?
All that stands in between all these dreams
Is miles and some gasoline
We can make 'em all come true

There's a place called forever
And we can go there together
We both want something better, baby
I know it's waiting, just up the road

Let's chase these white lines 'til we find that promise we've never known
Let's take that fast lane all the way, girl, heaven's just up the road

They say it goes on forever
And we can go there together
We both want something better, baby
And I know it's waiting, I know it's waiting
Just up the road
Just up the road

Let's chase these white lines 'til we find that promise we've never known
(What have we got to lose?)
Let's take that fast lane all the way, girl, heaven's just up the road
(Just up the road, there's a road, there's a road)
Let's chase these white lines 'til we find that promise we've never known
(Oh, what have we got to lose?)
Let's take that fast lane all the way, girl, heaven's just up the road
(Just up the road)
Let's chase these white lines 'til we find that promise we've never known
(Just up the road)
Let's take that fast lane all the way, girl, heaven's just up the road
