

Pale September

Will Hoge

In this bed where sparks
Once flew is now scars
And they won't go away
Just like stars, they only fade

And in my mind there's only you
Pale September, baby blue
Don't look back 'cause it's all gone
Did we lose it somewhere? Was it always wrong?

And why must we be tempted to believe
Love won't disappear just like a dream
Leave us alone the way it has like everyone before
And I don't believe forever anymore

Winter's cold gives way to spring
It's hard when time don't change a thing
So do we kiss or walk away?
It's the loudest silence with nothin' left to say

And why must we be tempted to believe
Love won't disappear just like a dream
Leave us alone the way it has like everyone before
And I don't believe forever anymore
Don't believe forever anymore
