

Be Who You Are Now

Winger

Look up and there you are
Dancing alone in the stars
Getting too close but so far away now

Look what you've almost missed
A transcendental kiss
The universal bliss inside you

Only you can make it better
Only you know how
You're beautiful, so be who you are now

So when are you coming down
From your castle made of clouds
Your karma will come back around and around

Only you can make it better
Only you know how
You're beautiful, so be who you are now

Lucid and you're caught in a dream
Trying to scream

Let them in, let them out
Then let them go
It's an evolution revolution
Now you know

The magic will begin
As without, within
'Cause everything is always changing

Only you can make it better
Only you know how
You're beautiful, so be who you are now

Look up and there you are
Dancing alone in the stars
Getting too close but so far away now
