

# Return To Glory

Winterstorm

Remember the times we had in the past  
Skies turned to black  
Depression spread fast  
Here we return to fulfil our quest  
The fire will burn  
In your chest

Now see our storm it sweeps over you  
The legend unborn is coming true  
We've marched over peaks  
And we've stood in the war  
For long time we've sought  
Our sighting was far

Marching with coldness inside our souls  
The forces of thunder  
Will lead us the road  
To come to the lands  
Were we once had gone  
To bring back the glory into town

We will never forget all the pleasure we had  
On our way to find the legacy  
Our ancestors once gave the treasure to us  
Uncertain of our destiny

See us return  
We're back again to earn glory for our victory now  
See us return  
To bring the light back in town

Hundreds of convicts  
Have relied on us  
Now look in their eyes  
Reflecting their luck  
The forecast is big  
We put in new crop  
So hear our words  
We'll go to the top
