

# Strange How Things Come Back Around

Wishbone Ash

Strange how things come back around  
Same chemistry and there's that sound  
Go so high then you float back down  
Strange how things come back around

Look towards the rising sun  
All that you see comes from the one  
Go your own way and I'll go mine  
Spirits fly and then combine

Go so high, float back down

Look towards the rising sun  
All that you see comes from the one  
Go so high then you float back down  
Strange how things come back around  
Strange how things come back around  
Strange how things come back around

Go so high, float back down
