

## Please don't forget me

Witchcraft

I wanted to know what the future would bring  
As I looked out the dark cave of my life  
I can predict anything that will be  
You'd have it too if you lived like me

Help my please cuz I'm down on my knees  
So they're gonna take me away  
I got nobody, struggles but my own  
But I still can't make it through the day  
I never wanted no one to run my life  
But now it's run by a point  
My woman is dead and I'm losin' my head  
And you gotta help me out of it, please
