## **Anybody's Window**

## Wolfsheim

Look through anybody's window See everywhere the same People su ffering from hunger A narcotizing pain

Call it justice, call it fair I just call it a mistake Starving masses cry for help In this state of decay

In this ruthless time And they heard the favorite pop songs To remind of times of wisdom They heard a thousand voices say Sati sfaction, fortune, health, so far away

Look through anybody's window See everywhere the same People su ffering from hunger A narcotizing pain

Call it justice, call it fair I just call it a mistake Starving masses cry for help In this state of decay

Looking people in their eyes See the concrete bricks behind See the false tears that they cry Feel this sleeping guilt inside Pray to heaven, pray to hell Pray for reason, for a way Public false asleepen eye No longer dream of paradise

Look through anybody's window See everywhere the same People su ffering from hunger A narcotizing pain

Call it justice, call it fair I just call it a mistake Starving masses cry for help In this state of decay
