

Nightforce

Wolverine

Well, I'm not really sure where you came from
And I don't care to go, where that is
But there's something about you, honey
That scares me, yet secretly drives me insane
I can see why the gypsy warned me,
Your bad news I've never felt before
A part of me wants to posses you,
But I feel a warning as the sunset falls
The nightforce is evil, the nightforce is evil
She's got the power that I just can't see
And I don't know what she wants with me
I'm just a man to weak, to weak to retreat
And I know that confidence won't help me now
Why can't she just be heaven's angel
Why would she want to hurt me this way
I can't hold back to this warmth inside me
As I smile she whispers there'll be hell to pay...
The nightforce is evil, the nightforce is evil
The nightforce wants me near you
I feel a chill deep down my spine
The nightfore won't let me go
As I hold her tight, her eyes glow
Well, I'm not really sure where you came from
And I don't care to go, where that is
But there's something about you, honey
That scares me, yet secretly drives me insane
I can see why the gypsy warned me,
Your bad news I've never felt before
A part of me wants to posses you,
But I feel a warning as the sunset falls
The nightforce is evil, the nightforce is evil
