

Lights & Fire

Wolves At The Gate

[Verse 1]

I'm hanging here just by a thread
Slowly fading and I'm seeing red
Losing all of my grip on everything I once held on to

[Pre-Chorus]

I just watch it unravel
On my downward spiral
All I ever held close to me

[Chorus]

Can you see the lights and fire fall?
Burning down till nothing's left at all
Sifting through the wreck and ashes, oh
Listen and you'll hear the love that calls

[Verse 2]

I'm laying here with nothing left
Just the ashes of my silhouette
Is there anything here but all the thorns that block my way out?

[Pre-Chorus]

I just watch it unravel
On my downward spiral
All I ever held close to me

[Chorus]

Can you see the lights and fire fall?
Burning down till nothing's left at all

Sifting through the wreck and ashes, oh
Listen and you'll hear the love that calls

[Bridge]

I just had to unravel
To a downward spiral
Losing all of my grip on
All I ever held close to me
I just had to unravel
To a downward spiral
All the thorns would tenderly lead
Somewhere so much better for me

[Interlude]

Then everything I once held onto
Everything I once held onto
Then everything I once held onto

[Chorus]

Can you see the lights and fire fall?
Burning down till nothing's left at all
Sifting through the wreck and ashes, oh
Listen and you'll hear the love that calls

[Outro]

Hear the love that's calling to me
Hear the love that's calling to me
