

A Good Night's Love

Wynette Tammy

What you need is a good night's love
Everything's gonna look a little better when the sun comes up
I'm here to see that you get enough
What you need is a good night's love

I can tell by looking it's been another crazy day
You've had your fill of workin' and worryin' bout the bills we've got to pay
But let's go talk about it now I know exactly what you need
Let's get the kids in bed and leave the rest up to me

What you need is a good night's love
Everything's gonna look a little better when the sun comes up
I'm here to see that you get enough
What you need is a good night's love

That's wine I have been savin' sure will taste good by candle light

I'll take the phone up off the hook the only one I'm talkin' through the night
And the things I whisper in your ear are gonna take your mind up of today
Just put yourself in my hands and let me love it all the way

What you need is a good night's love
Everything's gonna look a little better when the sun comes up
I'm here to see that you get enough
What you need is a good night's love

What you need is a good night's love
Everything's gonna look a little better when the sun comes up
I'm here to see that you get enough
What you need is a good night's love
