

Every Time You Touch Her (Think of Me)

Wynette Tammy

Do you hold her all night long do you sing her our love song
Do you kiss her lips until love makes her weak
Oh darlin'
Do you promise her the moon does she think love's comin' soon
Does she know each move is made from memory
Oh darlin'

Every time you touch her every time you touch her
Think of me

When she reaches out for you the same way my arms do
Does she know the truth your love belongs to me
Oh baby
Do you wander in the dark if she sees into your heart
Do you close your eyes so she will never see
Oh baby

Every time you touch her every time you touch her
Think of me

Nights were never made to spend alone
Oh I can wish you love but I can't wish you gone

Do you hold her all night long do you sing her our love song
Do you kiss her lips until love makes her weak
Oh darlin'

Every time you touch think of me
