

## Half the Way Home

Wynette Tammy

It was two country miles from your house to mine  
When we were just kids untouched by time  
I'd ask you to walk me home part of the way  
Then I'd walk you back some and we'd stop to play  
So it would go till daylight was gone  
Walking each other half the way home

It's been too rare to find a friendship as true  
And I felt the same faced walking with you  
Sharing our feelings from deep down inside  
Wakes you from the heart what we've since learned to hide  
Of all that I've done the best thing I've known  
Was walking a good friend half the way home

We should put some miles on that windey dirt road  
Talking of life and how far we could go  
It was early one summer and dreams were still new  
The last time I walked it with you

I've come two thousand miles after way too much time  
I've burned up the road to your house from mine  
I hope it's not too late to talk for a while  
Cause God's got you walking your last lonely mile  
And I knew you'd be too scared to do it alone  
So I've come to walk you half the way home
