

## We'll Talk About It Later

Wynette Tammy

There's a lady lyin' in your arms most ev'ry night  
She fulfills your needs and holds you tight  
Is she pretty does she love you like I do  
And do any of the children look like you  
If she's good to you then I could never hate her  
Just hold me close and love me and we'll talk about it later

Does she ever question where you go or what you do  
Is she here with us when I'm with you  
Does her body feel like satin to your touch  
And do you sometimes feel ashamed of us  
Well I don't know how many promises you've made her  
But I love you and it's OK we'll talk about it later

Lyin' with you face to face there's nothin' we can say  
Just one touch says more than we could talk about all day  
Time won't make it go away time just makes it greater  
And as you go we both know we'll talk about it later  
As you go we both know we'll talk about it later
