

When Love Was All We Had

Wynette Tammy

We used to sit and talk about the good things life had to give
Admired the ones who had it all and envied the way they lived
We used to say just to be that way would make all our dreams come true

We didn't know then we had more when we had only me and you

Diamonds and furs cars marked his and hers can't catch you when
you fall

And they don't compare with the love that we shared back when we had it all

We wanted to see just how far we could go but we've gone too far too bad

For we had more so much more when love was all we had

We wanted to see just how far we could go but we've gone too far too bad

For we had more so much more when love was all we had
