

You Could Be Coming to Me

Wynette Tammy

I hear stories and rumors goin' round about you
All our good old friends wanna make sure I do
I know who you been with and how you feel when you're through
Those stories and rumors are becoming to you

If you don't like where you've been going
Then you know where you could be
If you don't like what you're becoming
You could be coming to me

There's no one who knows you better than me
You need love more than lovin' and you think she could see
When you get tired of playin' like little boys all do
You'll be coming home to mama and I'll be waiting for do

If you don't like where you've been going
Then you know where you could be
If you don't like what you're becoming
You could be coming to me

If you don't like where you've been going
Then you know where you could be
If you don't like what you're becoming
You could be coming to me
