Your Love's Been a Long Time Coming

Wynette Tammy

Darling, let me spend a moment with you I want both of us to share what's on my mind There's been a change in you and I'm so happy For I haven't been this happy all the time

There's been something in your past and now it's dying It kept you from loving me all this time I can tell that she don't worry you any longer And after all these years you're really mine

'Cause your love's been a long time coming All the hurt just turned to loving And I'll take it before it's not too late

It took a long time to work it out Now it's here and there's no doubt Your love's been a long time coming But it's here to stay

It took a long time to work it out
