

# It's Only Love

Wynonna Judd

If life was a classroom  
And love was just a lesson  
An answer you can guess  
Until you get it right

You with your hand up  
Who are you impressing  
It's just when everything  
Is clearly in your sight

Will cast you adrift  
But I'm of the notion  
It is what it is  
Say it with me

It's only love  
You take it until it's gone  
The thing to build your world upon  
When it's getting rough  
It's only love  
There's nothing like a fantasy  
The way we think it ought to be  
It's never quite enough

If life was a spaceship  
Cruising through the cosmos  
Then love will be the rock that  
Blows you from your sky

Though it can be emotive  
It can be explosive  
And when it leaves you cold  
All you can do is lie

So bite your lip  
Hide your emotion  
It is what it is  
Say it with me

It's only love  
You take it until it's gone  
The thing to build your world upon  
When it's getting rough  
It's only love  
There's nothing like a fantasy  
The way we think it ought to be  
It's never quite enough
