

# World On Fire

Wynter Gordon

Born in 91 in the native sun  
Like a falling star transcending  
It had just begun when the west was one  
And the olden ways were abandoned

And there was no light and we were ok  
And there were machines that'll keep us safe  
And we had our bums, and we had our peace  
And were like gods, we were living like kings  
In our glory, the eagles flew up  
In our glory, we gave ourselves a way

[Chorus:]

We set the world on fire  
We set the fire standing right in the middle of it  
We let the flames grow higher  
We light the world on  
We light the world on  
We set the world on fire  
We set the fire standing right in the middle of it  
We let the flames grow higher  
We light the world on  
We light the world on fire

When the rock gets full, when the bombs, they blew  
When we hid away in a canyon  
No, we can't pretend, cuz we know our sin  
But we just keep taking our chances

And there was no light and we were ok  
And there are machines here to take our place  
And there is no-one, and there is no peace  
And we were playing god, we were living like kings

[Chorus]

Who's gonna comfort me?  
Oh now oh now oh now  
Who's gonna cry for me?  
Oh now oh now oh now  
When I'm on my knees  
Calling out, calling out  
Oh, now  
Who's gonna set me free?  
Oh now oh now oh now

[Chorus]
