X Japan

Oh! I'm looking at you
can't control myself
nothing, but pain for me

* wipe your tears from your eyes
just leave and forget me
no need to be hurt anymore

go away from me now
I don't know what is love?
no need to be hurt anymore

you said, "I miss you so much
everynight thinking of you
and facing loneliness"

ř But when you feel sadness
never can I stay with you

I'm not the one you need
close your eyes and forget me
there's nothing I can do anymore

I lost my way

I've been walking in the night of tears
there I found someone was holding you
as the night was falling down
with my love also vanished my vision of you

my heart is cold now

[* repeat]

you said, "I need you always
everyday thinking of you
and living loneliness"

[ř repeat]

[# repeat]

can't find my way
