

# White Noise

X-left to die

It never lets me down, it makes me see around  
You look stunned, so listen to this news  
Yes, it's true

It fixed the problems while I thought that I have died  
When I have it, brother  
I am cool  
Yes, it's true

My friends brought me bale, it was my birthday  
He laughed then he said "I have new friend for you, everybody screams, you w  
ill too"

Occured carousal of change, then I was loaded everyday  
Drugs will switch the truth, it shows you new point of view

I know the life is about trust  
But I listened to this all the time  
You know nothing about the pain  
That still hurts me more than all the time

At first it lets me down, all my friends said "Fuck you!"  
Everyone listens, we have emergency call  
Young man overdosed himself  
I am down, down

Your pics written in my head, tell me brother, why are you sad  
Your pics written in my head  
It can send all pain away, tell me brother, why I feel blame  
Don't help me, now it's too late

You scream on me, but everyone says  
Maybe it's ok, it's better time  
So please leave me, I dream about way  
Which takes me to grace, I will be fine

Faster and stronger  
I swear my brother  
at the end with power  
I fall over truth, I fall over you

Your pics written in my head, tell me brother, why are you sad  
Your pics written in my head  
My nervous system is down, it destroyed trust and my love  
Don't care about me  
Today's not tomorrow

You scream on me, but know it's too late  
You can see me wasted  
at the end of life  
I want come back, but know it's not where  
It's too late!
