

## Enemy

Xov

You know, you know, know  
In an open fire I don't understand what happened here  
Thought we were friends, no, I won't deny it  
I fell so deep, but you ran away so far from me  
Now that things have changed, you wanna know me  
But you don't know me, you know the old me  
Don't come up to me and talk as if we're homies  
'Cause we ain't homies, now you don't know me

I remember every word, every word you said  
I remember everything, everything you did  
I don't wanna be a friend or your enemy  
I remember every word, every word you said  
I remember everything, everything you did  
I don't wanna be a friend or your enemy  
You don't know, you don't know, you don't know  
You don't know, you don't know, you don't know  
You don't know, you don't know, you don't know

Whether I don't buy it, what you want from me?  
Just stay away, no apologies  
Now that things have changed, you wanna know me  
But you don't know me, you know the old me  
Don't come up to me and talk as if we're homies  
'Cause we ain't homies, now you don't know me

I remember every word, every word you said  
I remember everything, everything you did  
I don't wanna be a friend or your enemy  
I remember every word, every word you said  
I remember everything, everything you did  
I don't wanna be a friend or your enemy  
You don't know, you don't know, you don't know  
You don't know, you don't know, you don't know  
You don't know, you don't know, you don't know
