Anyway, i can try anything it's the same circle that leads to n owhere and i'm tired now

Anyway, i've lost my face, my dignity, my look, everything is g one and i'm tired now

But don't be scared, i found a good job and i go to work every day on my old bicycle you loved

I am pilling up some unread books under my bed and i really think i'll never read again

No concentration, just a white disorder everywhere around me, y ou know i'm so tired now

Don't worry i often go to dinners and parties with some old fri ends who care for me, take me back home and stay

Monochrome floors, monochrome walls, only abscence near me, not hing but silence around me

Monochrome flat, monochrome life, only abscence near me, nothin g but silence around me

Sometimes i search an event or something to remind me, but i've really got nothing in mind

Sometimes i open the windows and listen people walking in the d own streets. there is a life out there

But don't be scared, i found a good job and i go to work every day on my old bicycle you loved

Anyway, i can try anything it's the same circle that leads to n owhere and i'm tired now

Anyway, i've lost my face, my dignity, my look, everthing is go ne gone and i'm tired now

But don't be scared, i found a good job and i go to work every day on my old bicycle you loved

Don't worry i often go to dinners and parties with some old fri ends who care for me, take me back home and stay

Mochrome floors, monochrome walls, only abscence near me, nothing but silence around me

Monochrome flat, monochrome life, only abscence near me, nothin g but silence around me
