My heart is beating faster, faster There is an urge inside of me That special day I glanced into the unchangeable reality

The ones of you who called me a liar I have a big surprise for you You were the ones that made me suffer Now i will make you suffer too

Listen closely to the words I say You will not be able to change me

All the things you said echoes in my head and it's all because of my murderous urge Right now I feel no pain I will make you pay
Make you fade away
Like a flower my true color never change You'll not be able to kill me

The sky is colored red this evening I wonder why so suddenly? I don't know what my eyes are seeing The world is looking differently

I wash my hands with dirty water It doesn't matter anyway Without a thought of what I'm doing I disappear without a trace

Listen closely to the words I say You will not be able to change me

All the things you said echoes in my head and it's all because of my murderous urge Right now I feel no pain I will make you pay
Make you fade away
Like a flower my true color never change You'll not be able to kill me

Genji futto shinjitsuga Doko de tagauno karouka karataga kuchiateru nade Kimi wo omoette iru

All the things you said echoes in my head and it's all because of my murderous urge Right now I feel no pain
I will make you pay
Make you fade away
Like a flower my true color never change
You'll not be able to kill me
