

Too Young To Fight It

Young Love

Take a dare don't tell the truth
Keep this between me and you
Whispers become loud
When word of this gets out

Will the message cause a motion?
We won't know till we get there
When the suns down, lights come up
Friends and enemies come together

Summer nights
Hitting it so hard we're blistering
Can't keep from moving
The season is rising
We're too young to fight it
We stand united
Summer nights
Hitting it so hard we're blistering
Can't stop to sleep it off

Hearts are beating to the sound
Kids are living underground
Rumors get so loud
We want to scream and shout
It's taking over now you can't control it
You're shaking soaking wet in the middle of the night again

Will the message cause a motion?
We won't know till we get there
When the suns down, lights come up
Friends and enemies come together

Summer nights
Hitting it so hard we're blistering
Can't keep from moving
The season is rising
We're too young to fight it
We stand united
Summer nights
Hitting it so hard we're blistering
Can't stop to sleep it off
Can't stop to sleep it off

Will the message cause a motion?
We won't know till we get there
When the suns down, lights come up
Friends and enemies come together

Summer nights
Hitting it so hard we're blistering
Can't keep from moving
The season is rising
We're too young to fight it
We stand united
Summer nights
Hitting it so hard we're blistering
Can't stop to sleep it off

Summer nights
Hitting it so hard we're blistering
Can't keep from moving
The season is rising
We're too young to fight it
We stand united
