

Where Does the Love Go

Yvonne Catterfeld

We could write the story of how we fell apart
But your truth and mine ain't the same
So I'll write the words into my heart
For the chapter that bears your name

How could people go from a feeling that words can't describe
To a place of not even caring if I'm even alive

The love that we shared, did it fade into nothing
Where does the love go
After all the dreams that we had did it vanished completely
Where does the love go
Where does the love go

They say that love is a timeless energy, it never dies it just
changes form
But it when it changed from the shape of you and me it took the
shape of a raging storm

I'm not asking for second chances
I just want you to see
Until you take a look at yourself girl
You could never be free

The love that we shared, did it fade into nothing
Where does the love go
After all the dreams that we had did it vanished completely
Where does the love go?
The love that we shared, did it fade into nothing
Where does the love go
Where does love go?

When it dissipates does it turn to hate
If you see me on the street, would you talk to me
For the sake of love, ain't worth it babe?

The love that we shared, did it fade into nothing
Where does the love go
After all the dreams that we had did it vanished completely
Where does the love go (2X)
