

## Abnormal Intrusion

Yyrkoon

What do we know about the world  
And the universe that surround us ?  
The means that we possess  
to receive impressions

Black spiritual health

Are ridiculously not numerous  
We only see things from our standpoint

We will cross time, space and its dimensions  
And without budging, we will be able  
To examine the creation's heart

With five weak senses  
We claim to grasp complex cosmos  
While others being  
Perceive entire universes of matter

We will cross time, space and its dimensions  
And without budging, we will be able  
To examine the creation's heart

Thanks to this foul machine  
That will emit waves  
Open us unknown holy perspectives
