Eternal Love

Zandelle

Eternal Love
Heaven, it seems so close when you're by my side
When we're together it's paradise
There's nothing in this world that brings me greater joy
As when I look into your eyes

I never wanted anyone so much before

I call you up just so I could hear your voice Your laughter is music to my ears Your gentle touch sends shivers down my spine My passion soars when you are near

My love for you grows stronger day by day My heart belongs to you, believe me when I say

My life means nothing without you I feel such joy when we're together With all my heart I cherish you I want to make you mine forever my love

To kiss your tender lips and feel your warm embrace When you're upset, to make you smile

To whisper in your ear and take you by the hand

I'd travel for one million miles

The thought of losing you is just too much to bear Just hear these words and you will see how much I care

My life means nothing without you I feel such joy when we're together With all my heart I cherish you I want to make you mine forever my love
