

# Pioneer Of The Storm

Zed Yago

Back at least 5000 years  
people are sailing  
first in really simple ships  
courageous and daring

astronauts all in race  
astronauts of the space  
astronauts all in race  
explorers of the space.

Chained, in fragile vessels banned  
these seamen faced  
totally obscure element  
wild waves, fierce gales  
try to harness each hour  
to use the wind for power  
try to harness  
the wind for power.

It's an adventure into the unknown,  
Pioneer of the storm.  
Trust, only trusting the sun  
trusting the stars  
that's all, they had to lean on  
Moon Venus Mars  
each voyage a risk to get wrecked  
a journey called "never come back"  
each voyage a risk to get wrecked  
a journey called Pioneer of the storm
