

# Silent Holocaust

Zonaria

A black sky falls down and hits the eye  
Choose to live or wait to die  
The war is all around  
Too quiet to hear  
I see a shape of Armageddon appear  
This ravaging pain fills my heart  
With never-ending lies and cold obsessions  
Slowly tearing me apart  
A silent holocaust in the dark unveil the atomic gods

And when they unleash the silent holocaust  
Just believe in me  
Idols of the world turn to rust  
And cowards were those who covered the world in dust

I see a shape of Armageddon  
One emperor to rule the world  
Two enemies to the death, you and me  
Three messengers of genocide  
No, you are not my fucking god  
The heavens are burning  
Caressed by a nuclear god  
Knives keep on turning  
Bury the blades deep under my skin  
The slaves of utopia will rise for in the final hour  
You will witness the dead coming alive

When you feel the silent holocaust  
Just believe in me  
Idols of the world turn to rust  
As mother earth turns to dust  
Look into the eyes of the damned and watch me bleed  
Now you will be left in your misery  
For justice will only come through me
