

Take Some Time

ZSK

Would you take some time and listen to this song
I want to let you know and please don't get me wrong
I just wanna know, did you ever questioned
What happened with us?
And did you ever trust in all those happy days
Did you consider a future like this?
Did it hurt you, too me bleed inside?
Being left alone in desperation?
Now I start to wonder
What made me feel so wrong?

At home my stereo is playing our song
And when it's on the radio, I still sing along
When I remember all the good times, that are gone
In my heart and in my mind there is still this song
This is our song, it reminds me of the times that are gone now
This is our song don't you know
That this one is just for you, for you and me!

I don't know what the fuck did I expect?
Too bad it's always my fault
All the moments that we shared together
The stars we saw in the moonlight
I already miss you, when will we meet again?
And sometimes when I am all alone I think of you
And I wonder if you do the same
