

## Next to Me

Zug Izland

You think you look stupid  
You don't know what to say  
No confidence naked  
At least you feel that way

Give me a pill so I can make it go away  
I need an angle so I can walk the sea

I want you next to me  
I need you right next to me  
I want you next to me  
I need you you make me complete

Got stuck in the pavement  
Can't walk up to see  
No confidence naked  
Anixoiety

Give me a pill so I can make it go away  
I need an angle so I can walk the sea

I want you next to me  
I need you right next to me  
I want you next to me  
I need you you make me complete (you make me complete)

My silence killing me  
I can barley even breath  
My silence killing me  
I can barley even breath  
My silence killing me  
I can barley even breath  
My silence killing me  
I can barley even breath

I want you next to me  
I need you right next to me  
I want you next to me  
I need you you make me complete

I want you next to me  
I need you right next to me  
I want you next to me  
I need you you make me complete

I want you next to me  
I need you right next to me  
I want you next to me  
I need you you make me complete
